Yen Post-Doctoral Fellowship
in
Interdisciplinary Research

The Institute for Biophysical Dynamics at The University of Chicago invites applications from exceptional candidates for the Institute's Yen Fellowship in interdisciplinary research. Fellows will be recent Ph.D. graduates and are appointed for two years. Yen Fellows are given considerable latitude in defining their research direction within the laboratory of an Institute faculty member.

The Institute for Biophysical Dynamics is a new interdisciplinary research initiative at the interface of the Physical and Biological Sciences, with faculty drawn from six academic departments within the University of Chicago. Areas of current research interest in the Institute include biophysics, structural and chemical biology, single molecule studies, signal transduction and genetic networks and theory/simulation in these areas. A description of the Institute faculty and their research interests can be found at http://ibd.uchicago.edu/research_groups.html.

The Yen Fellowship is endowed by Dr. Yung-Tsai Yen and Mrs. Ho-Tzu Yen, and comes with a competitive salary as well as research and travel funds. Applications require a current curriculum vitae, at least two letters of recommendation, and a short statement of research plans. Applications are due on or before 25 February 2005 and should be sent to:

Juliana Feder, Ph. D.
Executive Administrator
Institute for Biophysical Dynamics
1117 Cummings Life Science Center
920 E. 58th Street
University of Chicago
Chicago, IL 60637

The University of Chicago is an Affirmative Action/Equal Opportunity Employer.
